Timber supplied to Government Departments.

99. The following statement exhibits the quantity of timber supplied to the Gun Carriage Factory, Bombay, and other Departments:—

Name of Department.	Bahan posts and rafters.	Babul logs.	Babul sleepers.	Babul planks.	Babul and bahan props.	Babul bolsters.

(b) Firewood and Charcoal.

Classes of firewood.

100. For the purposes of sale, firewood is assorted into the following three classes:—

	Class.			Size of billets.	Dimensions of stacks.			
Steamer fuel	• • • •	•••	•	3 to 4 feet long and 6 to 18 inches	75 75 0			
Railway fuel	•••	•••	•	3 to 4 feet long and 6 to 18 inches in girth 3 to 4 feet long and 12 to 30 inches in girth 2½ feet long and 7 to 30 inches in	15 × 15 × 3			
Loco. fuel	•••	•••		2½ feet long and 7 to 30 inches in girth	50 × 5 × 4			

101. The first is chiefly sold for consumption by ferry steamers, Municipal engines and for domestic use. Owners of local industries, such as cotton ginning factories and presses, oil and flour mills, distilleries, &c., purchase the second kind, and the third, as its name implies, is supplied to the North-Western Railway and sometimes to other purchasers.

Comparative yield of firewood and charcoal.

102. A comparison between the yields of the two years 1893-94 and 1894-95 in firewood and charcoal is shown in the statement given below:—

	Year.		* Firewood.	Loco. fuel.	Charcoal.	REMARKS.			
			Mds.	C. ft.	Mds.				
1893-94	•••	•••	433,357	7,427,557	89,513	* Firewood includes both steam-			
1894-95	•••	•••	371,727	7,583,234	90,711	er and railway fuel.			
	Increase	•••	•••	155,677	1,198	•			
	Decrease	•••	61,630	***	•••				

103. The above figures show that the outturn both in firewood and charcoal has been pretty even and calls for hardly any remarks except that it does not represent the total yield of the areas set apart for working during the year under report. Departmental operations were retarded not only owing to the late subsidence of the abnormally high flood of the year, but also to the great difficulty experienced in all divisions to obtain sufficient labour throughout the working season, caused by the opening of such large public works as the Jamrao

Canal and the Kotri-Rohri Railway. The progress of the work was also interrupted by the pressing of donkeys for the Chitral expedition as without the aid of these animals the professional wood-cutters cannot remove firewood from the forests to the river bank or railway station.

Quantity of fuel supplied to large consumers.

104. The subjoined statement shows the quantity of firewood supplied under departmental agency to the State Railway and other Depart-

ments and large consumers for two years :-

(c) Other Minor Produce.

Minor products.

105. Minor products are not collected through departmental agency in the Sind Circle.

II.—Removal of Produce by purchasers.

(a) Timber.

Comparative statement of timber removed by purchasers.

106. The following is a comparative statement for two years of the quantity of timber cut and removed from the forests by purchasers:—

Division.		Timber.		Posts.		Rafters.		Sleepers.		Planks.	
		1893-94.	1894-95.	1893-94.	1894-95.	1893.94.	1894-95.	1893-94.	1894-95.	1893.94.	1894-95.
